SUMMARY

Detail-oriented Software Engineer with hands-on experience in web development and software testing. Skilled in manual and automation testing using Selenium, with a strong understanding of SDLC, STLC, and Agile methodologies. Proven ability to identify bugs, improve system performance, and deliver high-quality applications.

Education

Bachelor of Technology (B.Tech.) – Artificial Intelligence & Machine Learning in Computer Science Engineering
S.B. Jain Institute of Management & Research, Nagpur - 441501
Expected Graduation: 2021-2025
CGPA: 7.03/10

Internships

1. **Web Developer, Maestro Intellectual PVT.LTD** June 2024 – July 2024

- Developed and maintained responsive web pages using HTML, CSS, JavaScript, and Bootstrap/Tailwind.
- Assisted in implementing website features, UI components, and layout improvements to enhance user experience.
- Assisted in creating mobile-friendly interfaces following modern web standards.

2. **Fronte End Developer, Aditva Technologies** December 2024 – May 2025

- Built and styled responsive user interfaces using HTML, CSS, JavaScript, and modern frameworks like Bootstrap/Tailwind.
- Converted UI/UX designs into clean, pixel-perfect, and mobile-friendly frontend layouts.
- Improved page responsiveness, accessibility, and load speed through optimized code and best UI practices.
- Collaborated with designers and developers to implement new features and enhance overall user experience.

Projects

1. **Product Demand Forecasting (Machine Learning)**

- Developed predictive model using Python for demand forecasting.
- Performed data preprocessing and improved prediction accuracy.
- Helped in better inventory decision-making.

2. **Manthan – Accommodation Booking System**

- Developed a responsive travel booking platform for flights and hotel reservations
- Implemented secure login, booking workflows, and user-friendly UI
- Improved performance and navigation for better user experience

3. **Cyclos Application Testing**

- Performed functional testing, regression testing, and UI validation
- Designed and executed test cases based on business requirements
- Identified and reported defects using proper bug lifecycle
- Ensured smooth user transactions and system reliability

4. **Bahmni Application Testing**

- Conducted end-to-end workflow testing across modules
- Validated input fields, forms, and backend data consistency
- Logged and tracked bugs, improving application quality
- Collaborated with developers to resolve defects

Certifications

Crowd Testing Certificate

HackerRank Certificate of Accomplishment

Software Testing with Java Automation

Web Development

TECHNICAL SKILLS

Languages: Core Java, SQL, JavaScript
Web: HTML, CSS, Bootstrap, Tailwind
Testing: Manual Testing, Automation Testing, Selenium WebDriver
Database: MySQL
Tools: Git, GitHub
Concepts: SDLC, STLC, OOPs, Defect Life Cycle

SOFT SKILLS

Communication Skills	Team Collaboration
Time Management	Attention to Detail
Adaptability	Quick Learning Ability
